

Tips To Pick Big Data Technology Stack

Amount Of Data

The tool should handle the amount of data you operate with daily.

1

Data Experts

Do you have data scientists in your company? If no, pick a tool that can automate the entire process.

2

Price

Research all costs related to the tool, including subscription plans and hidden fees.

3

Scalability

Start with a small pricing plan and then go to a bigger one relevant to your growth.

4

Support

Aim for a big data tool that offers 24/7 support and easy to understand documentation.

5

Reputation

What is the reputation of each tool you're estimating? Are the user reviews positive?

6

Data Sources

Choose a tool that combines multiple data sources and analyze structured and unstructured data.

7

User-friendly

Pick a seamless-to-use tool with a user-friendly interface that supports different user types.

8
